Guy:

Happy New Year. I am still out at this dump. I have a RCRA Question.

We have a bunch of totes/drums that we need to get rid of and I wanted to confirm the RCRA rules associated with the drum disposal/recycle. Most drum recycling companies (ie. National Container Corp, Industrial Container Corp, West Texas Drum) require the drums to have:

- 1. Drum Product Label**
- 2. Want MSDS for the Last Product**
- 3. Want the Drum cleaned and drip dry**

What are the Federal requirements associated with empty containers? I will also ask TCEQ.

Thanks

Gary Moore
